Commissioners,

Please consider this a request to **not** extend the "2 per 1" as currently adopted. It would be in the best interests of land use to retract it and extend it as a density requirement only. The larger parcels of land within the subdivision would then fall into the future zoning requirements. I have several clients who are leveraged as such that they need subdivision approvals sooner than waiting for future zoning to be in place. Respectfully,

John C. Horat, PE
